Welcome to our “Frosty Family Cabin” home. The framing features triple acid-free mats with acid-free backing. The adorable, whimsical designer’s cut not only compliments the image; but also adds to the fun portrayed by the snow family’s playtime. The mats pick up the many colors of evergreen shades in the print. The white beveled edges of each mat creates a 3D effect to focus your attention to the winter wonderland scene.

Both the dark spruce green inner mat and middle mats have rounded corners to mimic the roundness of the snowmen while the sage middle mat picks up the shadows of the snowbank. The outer mat completes a final touch of happy exclamation as it picks up the shape of the cabin’s roof.

The frame is a blend of walnut and silver featuring a mottled silver lip thus completing the warmth generated by this delightful P Buckley Moss creation.
